Ube versus taro

Must show: choose one primary comment first, then add supporting comments only if the narration has room. Text is lightly normalized for readability; usernames and profile details are intentionally omitted.

1	"Taro and ube are actually different things! Ube is described to be almost vanilla-like in taste while taro is light and nutty"
2	""I'm pretty sure taro and ube go hand I'm hand. I think taro is a root." and "ube tastes vanilla-like and taro tastes nutty" are pretty different statements imo"
3	"Taro and ube are different?!?"
4	"Taro and Ube are different yam roots"
5	"As a Filipino, I'm sooo glad that someone knows the difference between Taro and Ube thank youuuu"

Editor note: crop or blur usernames and profile photos. Keep this comment bank nearby while assembling the layered 9:16 sequence.
