Synthesis: appreciation with responsibility

Must show: choose one primary comment first, then add supporting comments only if the narration has room. Text is lightly normalized for readability; usernames and profile details are intentionally omitted.

1	"We promise we did not invent Ube. Just making sure she gets the spotlight she deserves!"
2	"It is pronounced OO-Beh. I hope it can be pronounced properly. But thank you for saying it is from the Philippines!"
3	"Taro and Ube are different yam roots"
4	"The Government should invest more in our agriculture"
5	"we might have a shortage of ube if it truly gets popular similar to matcha"

Editor note: crop or blur usernames and profile photos. Keep this comment bank nearby while assembling the layered 9:16 sequence.
